

MADISON ELECTRIC ON DEMAND

August 2023 Newsletter

Madison Electric Company is your full service distributor: Experts in electrical supplies, industrial automation, construction lighting, power quotes, HVAC, network communications, wire and cable, energy management, and pipes valves and fittings. We are ready to serve you!

Hubbell Wiring Device-Kellems EdgeConnect Technology

Hubbell's innovative, patented EdgeConnect™ screwless technology provides the fastest terminating industrial and commercial devices.

Strong levered steel springs inside the device apply pressure continuously. They eliminate screws and keep wires secure for a reliable connection, even in demanding environments.

Installers get more done in less time. Terminations are user ready, simply insert the wire and press the plunger down. No torquing, no tools for a fool-proof termination. It keeps wires secure but unwires easily. And no exposed screw terminals means enhanced safety!

MADISON ELECTRIC

Level I Thermography Certification Training at Madison Electric

Madison Electric will be hosting a 4-day Level I Thermography class at our Warren location. The course will run September 19th thru September 22nd from 8:00am-5:00pm. Customers that have purchased, or plan on purchasing cameras for their operational use will find this course exceptionally beneficial. The list price for this class is \$2200.00 per seat. *If course is booked through Madison Electric, the course price is discounted to \$1850.00 per seat.* Please contact your Madison Electric sales representative or Ron Simpson at 586-825-0200 or ron.simpson@madisonelectric.com to sign-up or for more information.

Cooper Lighting Solutions Intelligent Lighting Controls Training

As the world of controls evolves so rapidly, Clarus Lighting is offering a contractor training event. Cooper purchased Intelligent Lighting Controls in 2022 and is rolling out with training sessions to help contractors understand how this system works. Each system has its own challenges and idiosyncrasies that accompany its technology. Thru this event we are confident you will learn that ILC Controls are the easiest to install in the market. Lunch will be served while you learn about these exciting new products.

8/14 from 1:00pm-2:15pm or
8/16 from 11:30am-12:45pm

Please RSVP with your Madison Electric salesperson or at
claruscontrolssupport@clarus-lighting.com

EV-Pro Contractor Certification from Leviton

Are you and your customers all-in on electrification?

The future is electric, so be the go-to contractor for all things electric vehicle charging!

- Increase your ev charger installation opportunities and revenue
- Stay up to date on the latest product trainings
- Get ahead of ever-changing codes and standards
- Reduce the number of call backs

Apply to be a part of the EV-Pro Contractor Certification Program!

The EV-Pro Contractor Certification is a FREE program from Leviton designed to make your business stand out from the competition by giving you access to the knowledge and resources needed to become a recognized expert EV charger installer.

The program will give you access to:

- Certification courses on our EZ-Learn™ platform
- Unique EV-Pro certification number
- Digital marketing assets
- Co-branded collateral
- Show and event listings
- Information on the very latest code updates
- EV rebates and incentives you can share with your customers

On top of all these benefits, Leviton will send business your way by adding you to their exclusive listing of recommended contractors.
